

Continuum Bio/Compound Decoder - Pair-Resolved Structural Effect Report

Run ID: RUN_7F2DAB154E46B91C

Field	Value
Compound / formulation	NH3
Dose	1 mg
Interval	once daily
Daily-equivalent analysis load	1 mg/day
Condition/deviation states evaluated independently	5734
Parent constitutive reference templates	420
Rows with constitutive relation transition	1360
Pair-resolved active hits	1360

Resolved Chemical Definition

NH3 molecular mass 17.03052 g/mol atoms 4 (H:3 N:1) Compound projection SHA-256: 238cecafee1db7f308b6351defc1c3c13880dde642814fc1467dab60690f920c Manifold localization: entry 113 similarity 0.237605 Execution question: perturb each of the 5,734 represented biological condition/deviation states with this compound signature, then resolve the current compound state against each condition state using the restored pair-correspondence operator. Pair correspondence cannot create a hit. No cross-compound comparison is performed.
--

Primary Pair-Resolved Structural Response

Condition / structure	Pair-resolved compound / structure consequence	Criticality
Herpes simplex innate-adaptive host-defense structure altered configuration or regulated output of the named structure, expressed as the state described by herpes simplex	Pair correspondence: 0.211109 (JS 0.1065; sign 0.6875) Initial broken: 9/15 restored: 1 new breaks: 0 Residual broken: 8/15 net offset +0.011458 Direction: AWAY_FROM_REFERENCE	INFORMATIONAL new-break fraction 0.0000

Secondary Pair-Resolved Structural Responses

Condition / structure	Pair-resolved compound / structure consequence	Criticality
Herpes NOS innate-adaptive host-defense structure altered configuration or regulated output of the named structure, expressed as the state described by herpes	Pair correspondence: 0.209798 (JS 0.1032; sign 0.6953) Initial broken: 9/15 restored: 1 new breaks: 0 Residual broken: 8/15 net offset +0.010685 Direction: AWAY_FROM_REFERENCE	INFORMATIONAL new-break fraction 0.0000
Urosepsis innate-adaptive host-defense structure altered configuration or regulated output of the named structure, expressed as the state described by urosepsis	Pair correspondence: 0.208575 (JS 0.1069; sign 0.6719) Initial broken: 9/15 restored: 1 new breaks: 0 Residual broken: 8/15 net offset +0.011175 Direction: AWAY_FROM_REFERENCE	INFORMATIONAL new-break fraction 0.0000
Influenza innate-adaptive host-defense structure altered configuration or regulated output of the named structure, expressed as the state described by influenza	Pair correspondence: 0.205384 (JS 0.1047; sign 0.6641) Initial broken: 9/15 restored: 1 new breaks: 0 Residual broken: 8/15 net offset +0.011326 Direction: AWAY_FROM_REFERENCE	INFORMATIONAL new-break fraction 0.0000
HCV coinfection innate-adaptive host-defense structure altered configuration or regulated output of the named structure, expressed as the state described by hcv coinfection	Pair correspondence: 0.204797 (JS 0.1040; sign 0.6641) Initial broken: 9/15 restored: 1 new breaks: 0 Residual broken: 8/15 net offset +0.012060 Direction: AWAY_FROM_REFERENCE	INFORMATIONAL new-break fraction 0.0000
Syphilis innate-adaptive host-defense structure altered configuration or regulated output of the named structure, expressed as the state described by syphilis	Pair correspondence: 0.203420 (JS 0.1023; sign 0.6641) Initial broken: 9/15 restored: 1 new breaks: 0 Residual broken: 8/15 net offset +0.010640 Direction: AWAY_FROM_REFERENCE	INFORMATIONAL new-break fraction 0.0000
Malaria innate-adaptive host-defense structure altered configuration or regulated output of the named structure, expressed as the state described by malaria	Pair correspondence: 0.202711 (JS 0.1049; sign 0.6484) Initial broken: 9/15 restored: 1 new breaks: 0 Residual broken: 8/15 net offset +0.010669 Direction: AWAY_FROM_REFERENCE	INFORMATIONAL new-break fraction 0.0000
Anal discomfort anorectal mucosal and sphincter structural structure abnormal sensory-autonomic signaling indicating departure from the reference local functional state	Pair correspondence: 0.202162 (JS 0.1076; sign 0.6328) Initial broken: 173/325 restored: 1 new breaks: 14 Residual broken: 186/325 net offset +0.020354 Direction: AWAY_FROM_REFERENCE	MINOR new-break fraction 0.0431

Additional High / Critical New-Break Responses

Condition / structure	Pair-resolved compound / structure consequence	Criticality
Anuria renal filtration and urine-production structure near-complete absence of urine production or delivery to the bladder	Pair correspondence: 0.185810 (JS 0.0894; sign 0.6250) Initial broken: 0/1 restored: 0 new breaks: 1 Residual broken: 1/1 net offset +0.016110 Direction: AWAY_FROM_REFERENCE	CRITICAL new-break fraction 1.0000
Stinging skin cutaneous epidermal-dermal barrier and local immune structure altered configuration or regulated output of the named structure, expressed as the state described by stinging skin	Pair correspondence: 0.172073 (JS 0.0812; sign 0.5859) Initial broken: 0/1 restored: 0 new breaks: 1 Residual broken: 1/1 net offset +0.009064 Direction: AWAY_FROM_REFERENCE	CRITICAL new-break fraction 1.0000
Dyshidrotic eczema cutaneous epidermal-dermal barrier and local immune structure altered configuration or regulated output of the named structure, expressed as the state described by dyshidrotic eczema	Pair correspondence: 0.171116 (JS 0.0783; sign 0.5938) Initial broken: 0/1 restored: 0 new breaks: 1 Residual broken: 1/1 net offset +0.008863 Direction: AWAY_FROM_REFERENCE	CRITICAL new-break fraction 1.0000
Oculomucocutaneous syndrome cutaneous epidermal-dermal barrier and local immune structure departure from the reference structural configuration or regulated functional range	Pair correspondence: 0.170663 (JS 0.0675; sign 0.6406) Initial broken: 0/1 restored: 0 new breaks: 1 Residual broken: 1/1 net offset +0.010571 Direction: AWAY_FROM_REFERENCE	CRITICAL new-break fraction 1.0000

PRIMARY	INFORMATIONAL	MINOR	MODERATE/HIGH	CRITICAL
highest pair correspondence among active structural transitions	no new constitutive break	new-break fraction <= 0.25	larger new-break fraction	all local reference relations newly broken
